

Technical rider "HERBERT'S DREAM"
5 characters + 1 moon version - by plane
(temporary - to confirm when we make the contract)

FINALE PLACE :

A 15m diameter circular, flat place. The finale can be performed on grass, snow or ice.
To preserve the atmosphere of "Herbert's Dream", we need a calm space.

IMPORTANT to provide : 3 sandbags of about 20kg each.

PRODUCTION :

The control must be above the public in order to see the performance without difficulties.
The technician has to drive sound and lights together.

SOUND :

- a professional system of sound circulation, adapted to the place, with a preference for a broadcast in 2 points up above the audience, with a separation between highs and lows.
- electric needs in 220V/16A or electric adapters (European standards)
- 2 CD players
- 1 mixing desk

LIGHTS :

- 1 dimmer with 2 channels (2kW each)
- 2 extensions leads 16A, from the dimmer to the center of the moon
- **It is necessary to switch off public light on the finale place.**

DRESSING ROOM ON THE GROUND FLOOR :

- a dressing room for 7 people, near the beginning of the parade
- an easily access to the dressing room
- 7 steady desks (1m x 2m x 0,80m high)
- 7 chairs
- mirrors and washbasins for make-up, toilets
- electric adapters
- food, water for 7 people

STAFF :

- 5 people to follow the artists during the performance
- 1 people to set up and unset up material with the team and to keep over the moon

ORGANISATION :

- access to the dressing room when we arrive
- **18m3 of standard helium gas per performance on site for the balloon + the connection on which we can adapt our 8mm tube (inside diameter)**
- **2 batteries per character : 5 batteries 12V 5Amps (dim 9cm L x 7cm l x 10cm h) + 5 batteries 12V 7,6Amps (dim 15cm L x 6,5cm l x 9,5cm h).**
- **5 little white flashing Bengal lights**
- set up 3h before the beginning of the performance
- location the morning of the day of the performance
- a closed car park for our van or minibus (2,60m high)
